

Nechille Bayan

AI OPERATIONS | KNOWLEDGE MANAGEMENT

General Santos City, Philippines · +639097271129 · nechillebayan@gmail.com · linkedin.com/in/nechillebayan/ · Portfolio: nechillebayan.github.io/NechBayan

PROFESSIONAL SUMMARY

Knowledge management professional with hands-on experience building Claude- and Copilot-powered prompts, templates, workflows, and process documentation that deliver measurable business outcomes, including a Copilot workflow that raised team drafting throughput 2.3x. Focused on AI implementation, workflow automation, and process improvement across support and documentation functions.

AREAS OF EXPERTISE

AI Operations & Implementation · Workflow Automation · Process Improvement · Business Improvement · Prompt Engineering · Information Architecture · Content Governance · Process Documentation · Chatbot & AI Agent Enablement · AI Tool Evaluation · User Training & Enablement · Continuous Improvement · Knowledge Management

TOOLS

Claude · Microsoft Copilot · Salesforce Knowledge · Content Composer (CoCo) · Jira

KEY ACHIEVEMENTS

Led three cross-functional AI and documentation initiatives end-to-end, spanning workflow design, measurement, governance, and team enablement.

- Designed and maintained AI-powered prompts, templates, and workflows for a two-agent Copilot production system with a human review checkpoint, separating content generation from deterministic formatting and adding QA gates and audit logs as process documentation. Reduced repetitive manual tasks through workflow automation and increased drafting throughput 2.3x.
- Built a nine-tab AI productivity measurement system that isolated active work time from cycle time and normalized output by task complexity, converting AI adoption claims into measurable business outcomes and defensible evidence for continuous improvement decisions.
- Designed the knowledge lifecycle and governance framework for the KM function, including SLAs, KPI definitions, escalation paths, and Jira conventions, establishing a single source of truth for process improvement across the team.

PROFESSIONAL EXPERIENCE

Sovos | Knowledge Management Analyst

Jun 2025 – Present

- Own content strategy for the KM function, defining how content is structured across the help center, knowledge base, chatbot training data, and macros to serve both AI and human workflows.
- Support the development and training of a knowledge-based chatbot by structuring source content, identifying knowledge gaps, and evaluating answer quality, and recommended a metadata-first taxonomy serving both the chatbot and a second knowledge system.
- Migrated and restructured legacy content into Salesforce Knowledge with SMEs and Support leads, producing dual-purpose content serving both customer-facing help center documentation and structured chatbot training data.
- Built team pages and new-hire onboarding materials covering tools, workflows, standards, and responsibilities, and ran walkthrough sessions to explain technical concepts to non-technical users.

Accenture, Inc. | Technical Content Writer, Knowledge Management

Jun 2023 – May 2025

- Applied AI tools to accelerate content generation and editing, establishing repeatable processes that improved output consistency across the team.
- Defined and maintained the content architecture for help center documentation, knowledge base entries, internal announcements, and canned responses, accountable for how it was organized and how it performed against user needs.
- Restructured information architecture across support surfaces to reduce resolution time and improve self-service rates, using content performance signals to prioritize improvements.

Accenture, Inc. | Application / Cloud Support Specialist

Dec 2022 – May 2023

- Supported Microsoft 365 users across software, hardware, and connectivity issues, translating recurring support patterns into reusable troubleshooting articles and how-to guides that reduced repeat ticket volume.

EDUCATION & CERTIFICATIONS

Notre Dame of Dadiangas University | BS Electronics Engineering, 2020 | General Santos City, Philippines

Prompt Design in Vertex AI, Google Cloud (2024) · Google Data Analytics Professional Certificate, Coursera (2022) · Azure Fundamentals, Microsoft (2021)
